**RECONNAISSANCE LEVEL CHARACTERIZATION REPORT FOR GROUP A FACILITIES -  
BWM-005-00**

Ref: Brian W. Mathis ltr to Steve Tower, Response to Comments from the Colorado Department of Public Health and Environment (CDPHE) Regarding the Reconnaissance Level Characterization Report (RLCR) for Buildings 551, 662, 709, 910, and Tents 10 and 11

Provided for your review and approval is the revised Reconnaissance Level Characterization Report for Buildings 551, 662, 709, 910, and Tents 10 and 11. This report has been revised per our response to comments received from the CDPHE dated January 13, 2000.

This Report characterizes the physical, chemical and radiological hazards associated with the facilities, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results. Based upon our reassessment of the data and continued operations within the facilities, hazards are identified in these facilities, which classifies them as Type 2 Facilities. These facilities will require the preparation of follow-on documentation, which will discuss our plans for disposition.

During your review if you have questions, please contact Jeff Stevens, D&D Advanced Planning, extension 5797.
